Chromalloy Awarded Multi-Year U.S. Navy Contract to Repair LM2500 Gas Turbine Engine Components

PALM BEACH GARDENS, Fla, June 13, 2018 - Chromalloy, a leader in gas turbine engine component repair, advanced coatings, manufacturing and asset management, announced today the award of a firm-fixed-price, indefinite-delivery/indefinite-quantity services contract for the repair and refurbishment of LM2500 high pressure turbine hot section parts for the U.S. Navy. Chromalloy will perform inspections of all Navy-provided LM2500 components for serviceability and use industry-best practices to assess the parts for reparability. The repairs include water flow inspections, cleaning and stripping of airfoil coating, and employing weld and braze buildup processes to return worn or damaged parts to new part dimensional measurements.

"This contract award is indicative of the new capabilities continuously being implemented across our business. That, combined with our record of delivering high quality services on-time, makes us an excellent value-choice for customers," according to VP and Regional Managing Director – Americas, Jim Erickson. Work for this multi-year contract will be performed in Carson City, Nevada, and is expected to be completed by May 2024. "Our local team is proud to support this important military contract and continue to be a major employer in the community," said John Wasson, Chromalloy Site Leader at the Carson City, NV facility.

This contract was competitively procured via the Federal Business Opportunities website, with multiple proposals submitted, by the Naval Surface Warfare Center Philadelphia Division, Philadelphia, Pennsylvania.

Chromalloy serves the airline, military, marine and energy segments from locations around the globe. Chromalloy offers LifeX™ solutions consisting of proprietary parts and repairs, serviceable materials, and complete engine management solutions that reliably and economically extend the life of gas turbine engines. Chromalloy is authorized by the FAA and EASA and many other NAAs and is qualified under ISO and NADCAP. Chromalloy is a subsidiary of Sequa Corporation.

Sequa Corporation is a diversified industrial company with operations in the aerospace, energy and metal coatings industries. Sequa is a Carlyle Group company. For additional information, visit www.sequa.com
