**Chromalloy selected by U.S. Air Force for
F108 Turbine Engine Nozzle Repairs**

**Contract Valued at \$3.3 Million Covers High Pressure Turbine Nozzles
for KC135R Tanker Aircraft Engine**

ORANGEBURG, NY, September 9, 2009 – Chromalloy announced today that it has been selected by the U.S. Air Force to provide High Pressure Turbine (HPT) nozzle repairs to support the Air Force's overhaul of F108 gas turbine engines that powers the KC135R tanker aircraft.

The contract awarded by the Air Force at Tinker Air Force Base is valued \$3.3 million, for work that will continue for approximately six months. The contract is the third to be awarded to Chromalloy for the nozzle repairs on the F108 engine.

“Chromalloy welcomes this opportunity to again bring our extensive investments in commercial turbine engine repair to provide the Air Force with superior capability and reliability – and support mission readiness to the Air Force,” said Armand F. Lauzon, Jr. President.

The KC135R fleet includes more than 400 aircraft deployed by the Air Force at Tinker Air Force Base. The aircraft provides refueling for military aircraft in flight.

In addition to F108 turbine repairs and components, Chromalloy also provides replacement blades, vanes and nozzles for the CFM56-2 aircraft engine, the commercial variant of the F108 military engine.

With facilities and service centers around the globe, Chromalloy supplies advanced repairs and services for gas turbines used in aviation and land-based applications, repairs, refurbishes and manufactures engine components.

2 – KC135R Tanker Nozzle Repair

The company also designs and manufactures FAA-approved replacement parts for aircraft engines that are certified to meet or exceed the performance, reliability and durability specifications of original equipment manufacturer parts.

In support of land-based applications, Chromalloy employs identical engineering disciplines used to produce its FAA-certified parts.

Chromalloy serves commercial and military customers worldwide and has operations in the U.S., Mexico, the U.K., Netherlands, Italy, Germany, France, the U.A.E., Israel, China, Singapore, Thailand, Japan and Australia.

More information is available at www.chromalloy.com.

Chromalloy has evolved from a gas turbine parts repair business into the leading independent supplier of advanced repairs, parts and MRO for gas turbines used in aviation and land-based applications. Today Chromalloy serves the airline, military, marine and industrial gas turbine markets with a broad range of services from locations in 14 countries around the globe. Chromalloy is authorized by the FAA and EASA and many other NAA's and is qualified under ISO and NADCAP. Chromalloy is a division of Sequa Corporation.

Sequa Corporation is a diversified industrial company with operations in the aerospace, metal coatings and automotive industries. Sequa is a Carlyle Group company. For additional information, visit www.sequa.com.
