

## Chromalloy Material Solutions Unveils New Fort Lauderdale, Florida, Sales and Warehouse Operation

POSTED ON MAY 21, 2015

Chromalloy today announced a new Fort Lauderdale, Florida, sales and warehouse facility to house its growing Chromalloy Material Solutions (CMS) business unit.

“Chromalloy Material Solutions, our global parts and materials trading business, has moved into a new 70,000 square foot facility to better serve customers,” said Carlo Luzzatto, President. “As a material and asset provider to the global gas turbine engine industry, CMS staff and warehouse are now poised for additional growth in the expanding materials arena.”

Previously Chromalloy Materials Solutions staff and equipment were in San Antonio, Texas; Newnan, Georgia; and Miramar, Florida. Locating the company’s trading business at a single larger site will drive customer efficiency while offering space for future growth.

Formed in 2010, Chromalloy Material Solutions is a materials distribution business that buys, sells and exchanges repair parts materials to the airlines, MROs, depots and other customers. Led by Todd Jensen, General Manager, Chromalloy Material Solutions operates in materials from engine parts and components to entire engine systems, airframe materials, and a range of energy industry materials including aero-derivative gas turbines used for power generation.

The business also provides management and supply chain support for aftermarket supply companies worldwide and assists in establishing market values for repairs and inventory.
