

Chromalloy labs receive testing accreditation

Posted on May 07, 2014

Chromalloy, Palm Beach Gardens, Fla., announces that the six laboratories at the company's Engineering Center of Excellence have received ISO/IEC 17025 accreditation, validating international standards requirements for testing services. The following Chromalloy labs were accredited to ISO/IEC 17025 by the ANSI-ASQ National Accreditation Board/ACLASS: Metallurgy, Modal, Fatigue, Airflow, Metrology and Optical Metrology.

The center serves the company's global network of gas turbine engine component repair and manufacturing centers, and also provides engineering, test, and lab services to customers worldwide.

"With ISO/IEC 17025 accreditation, Chromalloy builds on our world-class processes with the technical competence and ability to produce precise and accurate test data for customers around the globe," said Carlo Luzzatto, President. "Chromalloy provides the entire value chain of services for gas turbine components, from engineering and testing through casting, machining and advanced coatings."

Accredited labs are regularly reassessed to ensure the process standards and technical expertise are maintained.

Chromalloy is a leading supplier of technologically advanced repairs, coatings, investment castings, and services for turbine airfoils and other critical engine components. The company serves engine manufacturers and operators in commercial aerospace, defense, and the energy industry.
